

Eric Stern for Alameda County Area Representative

I am requesting the privilege of representing Alameda County members on the Local 1021 Executive Board. I am a third term Chapter President at RCEB (a 304 member worksite), a DD Industry Council member, and I believe in a worker-managed union where worker satisfaction is the bottom line. Local 1021 needs help to complete the transition to the mega-local we have become.

Often during our 3-year transition process members have felt uninformed and unheard. We need stronger worksite organizer presence and expertise. Member leaders need training and support. Our organizers need manageable workloads and realistic territories. Most importantly, 1021 must institute feedback at every level to identify problems and find solutions. Some worksites have been troubled for years. Let's form a multi-disciplinary task force to help heal deeply entrenched worksite dynamics that undermine workers and the union.

I will work hard to create a worker-managed union. Please visit the www.Change1021.org website to learn about the slate of candidates I am running with. Now is the time to vote for change.
