

Nancy Atwell for Sonoma-Lake County Area Representative (Region 6)

With the difficult economic times ahead, health care and layoffs will continue to be concerns for members. As your representative, I will advocate for issues important to our region and promote accountability, fiscal responsibility, and transparency. I am not afraid to raise difficult issues and look outside the box for solutions. We deserve a Union that stands up for its members.

I have worked at Sonoma County's Permit & Resource Management Department for 9 years. I am a Local Contract Action Team (CAT) Member Leader, chair of the local Bylaws Subcommittee, COPE Committee member, 1021 Industry Council member, and was on the 1021 Membership Advisory Committee. While serving on the Bylaws Committee I advocated for equal representation opportunities for smaller counties and cities. I have developed collaborative relationships with members in other counties and with current officers, which will help me serve as a liaison between members in our Region area and the Executive Board.
