

## **Dave Fleming For RN Industry Chair**

I am David Fleming, RN. My experiences include 10 years military service as a Medic Counselor, and the designer/director of social/recreation programs for children with special needs.

For the last 12 years I have been working in the Emergency Department at San Francisco General Hospital. Currently I work in the PACU and additionally; I present a class for student nurses and LVNs to add to their clinical experience.

My Union experiences include work as a shop steward and Co-Chair of the Labor/Management Monitoring Committee. Over the last year I have focused on raising Union visibility in the hospital, expanding the shop steward base, increasing communication and representation with our members, publishing of a quarterly news letter, engaging in continuing arbitration over contractual violations by the City of San Francisco, member representation with budget cuts and reassignment, and a member of our negotiating team.

I believe in the principle that the Union should address the needs of those in the work place: **DIRECT REPRESENTATION OF OUR DUES PAYING MEMBERS.** I am running with other rank and file union members who are part of the Change 1021 team (visit [Change 1021.org](http://Change1021.org)).

Thank you for your support.
